a Error rate vs assembly contiguity
Spearman ρ = -0.08, p = 0.39
Species false-loss rate (%)
Contig N50 (bp)
b Fitted gene fragility
Share of genes
Gene fragility κ (multiplier of species error rate)
c Losses per gene
observed
simulated (20 genomes)
Share of testable genes
Species with the gene lost
d Losses per species
Simulated share (%)
Observed share of genes lost (%)
